

BioLite is excited to partner up with the **Nevada City Chamber of Commerce** and **Victorian Christmas** to provide sustainable energy to participating event vendors. We offer a completely exhaustless, easily portable generator that will power lights, appliances, and tools with silent and odorless operation. And it is fully rechargeable from traditional plug-in sources, or, even better, solar power.

The Chamber is offering a special discount deal for vendors as part of your registration with Victorian Christmas. Your registration qualifies you to purchase these BioLite products at Wholesale pricing!

These products are useful for much more than powering your event booth and will help keep downtown Nevada City clean of gas fumes and rumbling gas generators with fully sustainable power.

This link gives more details on the products on offer for this special program.

[BioLite BaseCharge and Solar details](#)

As part of your registration, indicate which products you would like to purchase at the special price, and these will be ready for pickup by November 21 2022
